Part I Industrial Track

Part II Fast Abstract

Part III Student Forum

Part I Industrial Track

Applying the CoFI Testing Methodology to a Multifunctional Robot End-Effector

*Anjos, J. M. S.; Gripp, J.; Pontes, R. P.; Villani, E.*

The Dependability Approach for the New Version of VLS On Board Software

*Dotti, E.; Lahoz, C. H. N.*

Automated validation of embedded optical network software

*Fadel, A. C.; Moraes, R.; Martins, E.*

Interesting Results with an Optimizing Compiler when Refactoring Embedded Code

*Fialho, M. A. A.*

Use of Design Diversity to Mitigate COTS Design Faults in Flight Controls System Applications

*Manelli, H. N.; Souza, M. L. O.*

Modification to Legacy Software Developed per DO-178A Level 1 to DO-178B Level A: How to Organize Software Life Cycle Data for Software Approval in Aircraft Certification

*Marques, J. C.*

Requirements for an Instrumentation Tool of Distributed Airborne Safety Critical Software

*Morigaki, R.*

Practical Results from Requirements Verification for HW/SW Complex Systems

*Silva, N.; Lopes, R.*

A reliable computational system for estimate the performance curve of pmdc motors

*Silva, G. F.; Marques, S. T.; Faria, A. W. C.*

A Vision System for Electronic Control Unit Testing Using Hardware In the Loop

*Vasconcelos, T. M.; Faria, A. W. C.*

Advance adherence to the upcoming standard ISO/IEC 29119

*Villas-Boas, F. R.; Almeida, É. R. C.; Abreu, B. T.*

## Part II Fast Abstract

Testing model transformations which derive executable test cases from abstract ones

*Almeida, E. R. C.; Martins, E.*

A Bidimensional Wavelet Transform based Algorithm for DoS Attack Detection

*Azevedo, R. P.; Mozzaquatro, B.; Cappo, C.; Nunes, R. C.; Schaerer, C. E.; Kozakevicius, A.*

Supporting requirements formulation in software formal verification

*Campos, J. C.; Machado, J.*

Achieving Eventual Leader Election in WS-Discovery

*Campos, F.; Pereira, J.; Oliveira, R.*

Generating test scenarios and improving software quality with model-based testing

*Letizio, C. C.; Villas-Boas, F. R.; Abreu, B. T.*

Partial Plant Models in Formal Verification of Industrial Automation Discrete Systems

*Machado, J.; Campos, J. C.*

How Much Test Costs Are Impacted by Test Environment Development and Maintenance?

*Mendonça, C. H.; Ambrosio, A. M.*

A New State-Model Based Approach for Refinement of Space Application Requirement

*Moraes, M. H. E.; Ambrosio, A. M.*

Model Checking a Decentralized Storage Deduplication Protocol

*Paulo, J.; Pereira, J.*

Generation Environment, Execution and Test Management Software Embedded

*Reis, M. F.; Ambrosio, A. M.; Ferreira, M.*

## Part III Student Forum

Towards Security Benchmarking of Transactional Systems

*Araújo, A. N.*

FPGA-based fault injection architecture for real time software dependability testing

*Corsetti, A.*

Security Validation through Fault Injector Plug-in

*Galantini, R.*

Validation of Reasoning and Decision-Making of a Satellite Autonomous On-board Software

*Kucinskis, F. N.*

Benchmarking the Security of Web Serving Systems

*Mendes, N.*

An Architecture for Test Procedures Execution Applied to a Satellite's  
On-Board Data Handling Computer (OBDH)

*Pereira, T. D.*

A MPI Implementation of Gusfield's Algorithm to Generate Cut Trees

*Rodrigues, L. A.*

An Approach for Dependability Conformance Analysis from Code to  
Architecture Description

*Silva, R. A. B.*
